
Shuffled-reward null, 64 problems x 8 samples per step; each line is one pod's step records. Run 1's line lies under run 3's seed 0 to step 30, where the two were equal. Run 2's nulls ran to step 400 and stayed near zero after step 35 (cut here at step 100). Run 3 seed 70 ended at the filed step-20 reward-change check; its restart was not run.
