SKETCH, made-up numbers: how far each recipe grows R's update at a held pass rate
Rival A: the pass rate holds as the update grows;
a higher rate reaches 10x first
Rival B: higher rates drift; nothing past
5x holds the bar (1e-5 stopped at step 50)
2x
5x
10x
bar: R at step 100 minus 0.03
W0's pass rate
held-out GSM8K pass rate
0.900
0.875
0.850
0.825
0.800
0.775
0.750
0.725
R, peak rate
1e-6, to 250 steps
3e-6, to 200
1e-5, to 100
10^{-1}
10^{0}
10^{1}
output change / masked error
made-up numbers; the run: one seed, reads at steps 25-250, pass rate over the ~1250 of 1319 GSM8K test problems that fit
